

**Michelle Mills Strout**  
Department of Computer Science  
University of Arizona  
<http://www.cs.arizona.edu/~mstrout/>  
[mstrout@cs.arizona.edu](mailto:mstrout@cs.arizona.edu)

### Research Interests

Programming models for domain scientists and performance programmers. Techniques for making such programming models result in efficient implementations including compile-time and run-time transformations for data locality and parallelization. Other research interests include combined static and dynamic program analysis, interaction of compilers with modern architectures, domain-specific compilation, scientific computing, and software engineering.

### Education

Doctor of Philosophy degree in Computer Science July 2003  
University of California, San Diego  
Advisors: Dr. Larry Carter and Dr. Jeanne Ferrante

Master of Science degree in Computer Science December 1999  
University of California, San Diego

Bachelor of Science degree in Computer Science June 1997  
University of California, San Diego  
Honors: Summa Cum Laude

### Awards and Honors

DOE Early Career Award, March 2010 through March 2015  
NSF CAREER Award, March 2008 through March 2013  
AT&T Labs Grant and Fellowship, 1997-2003  
National Science Foundation Fellowship, 1997-2000

### Professional Experience

**Acting Department Head of Computer Science at University of Arizona** August 2018 - May 2019

**Full Professor at University of Arizona** August 2015 - present

**Associate Professor at Colorado State University** August 2011 - August 2015

**Assistant Professor at Colorado State University** August 2005 - 2011  
Research included the automatic generation of run-time reordering transformations (i.e. inspector/executor strategies) and programming models that enable the separation of algorithms from implementation details.

**Enrico Fermi Postdoctoral Scholar at Argonne National Laboratory** September 2003 - July 2005

**Research Associate at the University of Chicago** (joint appointment)  
At Argonne I researched domain-specific program analysis for automatic differentiation.

**Research Assistant at University of California, San Diego** September 1997 - June 2003  
With my advisors Dr. Jeanne Ferrante and Dr. Larry Carter, I worked on the Hierarchical Tiling project and the Sparse Tiling project.

**Summer Intern at AT&T Labs Research** Summer 1997  
I worked with Dr. Ken Lyons to implement virtual shared memory for PCs running Windows NT with a Myrinet interconnect.

**Senior Coder at University of California, San Diego** October 1994 - April 1996  
Systems administration, I created and maintained user resources and assisted users with various problems.

## Teaching Experience

### **Professor at University of Arizona**

*Software Development, CSc 210*

Spring 2018, Fall 2018

CS3 where students learn algorithmic patterns such as recursive backtracking and learn to implement data structures such as graphs, hashtables, and trees while transitioning from Python to Java.

*Principles of Compilation, CSc 553*

Spring 2017

A graduate course where students learn various program analysis and optimization concepts and practice some of those concepts with the LLVM compiler. There is a heavy emphasis on data-flow analysis, the polyhedral loop transformation framework, and peer reviews of assignment writeups and programs.

*Compilers and Systems Programming, CSc 453*

Fall 2016

An undergraduate course where students develop a compiler incrementally, with each deliverable for the compiler project involving code generation and some peer code reviews. The students develop a compiler in Haskell that translates a subset of Java called MeggyJava to AVR assembly that can then be linked into an executable for the Meggy Jr device.

*Topics in Programming Languages, CSc 620*

Spring 2016

A graduate-level seminar course where students presented numerous parallel programming models and then worked with scientists at UA to port existing codes to parallel programming languages and compare performance and programmability across languages.

### **Assistant and Associate Professor at Colorado State University**

*Foundations of Fine-Grain Parallelism, CS560*

Spring 2012

A graduate-level course that teaches performance programming, program optimization, and loop transformation theory including the polyhedral model.

*Undergraduate Compilers, CS453*

Spring 2007-2011, 2013, 2015

Updated this course so that student develop a compiler incrementally, with each deliverable for the compiler project involving code generation. The students develop a compiler that translates a subset of Java called MeggyJava to AVR assembly that can then be linked into an executable for the Meggy Jr device.

*Computer Organization, CS270*

Fall 2008, Fall 2012

Updated this course in collaboration with Wim Bohm so that the assignments were more substantial and include more opportunities for students to work with the C programming language. In addition, the students did seven graded labs during recitation sections in the new version of the course.

*Topics in Programming Language Design and Implementation, CS653*

Spring 2006-2008, Fall 2010-2011

Developed a graduate seminar course where students learn how to read and present papers as well as how to do a research project. Topics vary based on current research activities.

*Graduate Compilers, CS553*

Fall 2005, 2006, 2007, 2009, 2015

Developed a graduate-level compilers course that teaches garbage collection, data-flow analysis, program optimization, and loop transformation theory including the polyhedral model.

### **Co-Instructor at University of Chicago**

Spring Quarter 2004

*Graduate Computer Architecture, CS32200*

Prepared half the lectures, developed homeworks that involved using computer architecture research tools such as SimpleScalar, and guided students through a quarter long research project or survey paper.

### **Volunteer Instructor for Upward Bound at University of California, San Diego**

January 2003

Developed a program that demos convolution and then used it to teach a number of two hour sessions to high school students involved in upward bound.

### **Instructor at University of California, San Diego**

Summer 2001

*Computer Organization and Systems Programming, CSE30*, 4 quarter credit hours

Prepared 4 lectures per week, developed 3 assembly language programming assignments, organized grading done by teaching assistants, wrote quizzes, midterm, and final exam.

<b>Volunteer High School Instructor at University City High School</b> <i>Web Programming</i>	January 2000 - June 2000
Designed curriculum, coordinated with 2 other computer science students, lectured, and helped students in the lab. The class introduced students to HTML, cgi-programming, MySQL, Java, etc.	
<b>Teaching Assistant at University of California, San Diego</b> <i>Compiler Construction II, CSE131B</i> , 4 quarter credit hours	Winter 1999
Led sections, organized class project, and helped students in the lab.	
<b>Teaching Assistant at University of California, San Diego</b> <i>Design and Analysis of Algorithms, CSE101</i> , 4 quarter credit hours	Summer 1998
<b>Teaching Assistant at University of California, San Diego</b> <i>Computer Organization and Systems Programming, CSE30</i> , 4 quarter credit hours	Summer 1995
<b>Teaching Assistant at University of Toledo</b> <i>Problem Solving course for Engineering students</i>	Spring 1993

### **Masters Students Graduated**

Benjamin Gaska, "ParForPy: Loop Parallelism in Python," University of Arizona, May 2017  
Stephanie Dinkins, Colorado State University, February 2012  
Alan LaMielle, Colorado State University, 2010  
Andrew Stone, Colorado State University, 2009

### **Ph.D. Students Graduated**

Christopher Krieger, Summer 2013  
Andrew Stone, Summer 2013  
Christopher Wilcox, Spring 2012

### **Grants and Research Funding**

**NSF Co-PI**, lead PI Reed Maxwell at Colorado School of Mines, "Collaborative Research: Framework: Software: NSCI : Computational and data innovation implementing a national community hydrologic modeling framework for scientific discovery," 8/15/2018 to 8/14/2022, \$700K to University of Arizona (half to Computer Science).

**NSF PI**, lead PI Mary Hall at University of Utah, "SHF: Medium: Collaborative Research: An Inspector/Executor Compilation Framework for Irregular Applications," 8/1/2016 to 7/30/2020, \$1.2 million (\$400K to University of Arizona).

**NSF PI**, "SHF: Small: The Loop Chain Abstraction for Balancing Locality and Parallelism," 8/1/2014 to 7/31/2017, \$499,954.

**NSF PI**, "The 24th International Workshop on Languages and Compilers for Parallel Computing (LCPC 2011)," 9/1/2011 to 2/31/2012, \$2,500.

**NSF Co-PI**, "CI-P: Cyber-Infrastructure for the Cloud-Climate Community," lead PI David Randall, 2/1/2011 to 1/31/2012, \$96,893.

**NSF Significant Contributor**, "Inverse Problem for Estimating Structure of Biological Macromolecules from SAXS," lead PI Jay Breidt, Fall 2010 through Summer 2012, \$1.1 million.

**DOE Principal Investigator**, "DOE Early Career: Separating Algorithm and Implementation via Programming Model Injection (SAIMI)", Spring 2010 through Spring 2015, \$750,000.

**DOE Co-PI**, “CACHE Institute: Algorithms and Software for Communication Avoidance and Communication Hiding, CACH at the Exascale”, Spring 2010 through Spring 2013. A collaboration between Lawrence Berkeley Labs (Erich Strohmaier), Berkeley (James Demmel), Argonne National Laboratory (Paul Hovland), and Colorado State University (Michelle Mills Strout), \$166,095 to Colorado State University.

**NSF Principal Investigator**, “CAREER: Parallelization using Inspector/Executor Strategies (PIES)”, NSF Faculty Early Career Development (CAREER), CCF-0746693, February 2008 through January 2013, \$397,235.

**NSF Principal Investigator**, “REU for CAREER: Parallelization using Inspector/Executor Strategies (PIES)”, NSF Faculty Early Career Development (CAREER), February 2008 through January 2013, \$11,891.00.

**DOE Co-PI**, “SciDAC Institute: Combinatorial Scientific Computing and Petascale Simulations (CSCAPES)”, January 2007 through December 2011, \$132,000 to Colorado State University, PI: Alex Pothén at Old Dominion University (ODU), Co-PIs: Florin Dobrian and Assefaw Gebremedhin at ODU, Erik Boman, Bruce Hendrickson, and Karen Devine at Sandia National Laboratory, Paul Hovland, Boyana Norris, and Jean Utke at Argonne National Laboratory, and Umit Catalyurek at Ohio State University.

**DOE Principal Investigator** with Co-PI Paul Hovland at Argonne National Laboratory, “Collaborative Research: Representation-Independent Compiler Technology for Domain-Specific Analysis with the Open-Analysis Toolkit”, DOE DE-FG02-06ER25724, March 2006 through February 2010, \$213,281 at Colorado State University.

### Student Grants and Awards

**Advisor** Brandon Neth received Honorable Mention for the Computing Research Association’s (CRA) Outstanding Undergraduate Researcher Award for PhD-granting institutions 2018.

**Co-Advisor with Mary Hall** Anand Venkat received The University of College of Engineering Outstanding Dissertation for 2016 for the dissertation entitled “An Integrated Compiler and Runtime Framework for Sparse Matrix Codes,” Spring 2017.

**Advisor**, Ian Bertolacci received a scholarship to attend the 2016 ACM SIGPLAN Programming Languages Mentoring Workshop at the Conference on Programming Language and Implementation (PLMW@PLDI 2016), June 2016.

**Advisor**, Anthony Encinas won honorable mention in the Analytical Research category at the Honors First Year Project showcase, April 2016.

**Advisor**, Ian Bertolacci won 3rd place in the SC Undergraduate Student Research Competition, November 2014.

**Advisor**, Ian Bertolacci won 1st place in the Undergraduate Poster Competition at Rocky Mountain Celebration of Women in Computing (RMCWiC), October 2014.

**Advisor**, Samantha Wood won 1st place in the PLDI Undergraduate Student Research Competition, June 2011.

**DREU Mentor**, Distributed Research Experiences for Undergraduates summer research (sponsored by CRA-W, funded by NSF or DOE grants), \$6000 to each student for 10 weeks of research under my supervision, Summer 2007 (2 students), Summer 2010 (2 students), Summer 2011 (1 student).

**Advisor**, Women in Natural Sciences (WINS) 2008 travel grant for undergraduate Christie Williams, \$300.

**URI Mentor**, College of Natural Sciences Undergraduate Research Institute Award, \$4000 funded to one undergraduate student for 10 weeks of research under my supervision, summer 2007.

## **External Service and Outreach Activities**

Program Committee Member for Programming Languages Design and Implementation (PLDI 2020).

Program Committee Member for the ACM SIGPLAN Symposium on Principles and Practice of Parallel Programming (PPoPP 2020).

NSF Panel 2019.

Technical papers co-chair for Supercomputing 2019.

Programming Languages Mentoring Workshop (PLMW) @ PLDI 2019, co-organizer.

External technical program committee member for the 33rd ACM International Conference on Supercomputing, ICS 2019.

Programming Systems Committee member for Supercomputing 2018.

External Program Committee member, OOPSLA 2018.

External Program Committee member, PLMW organizer, and Sponsorship chair for PLDI 2018.

Program Committee Member for the 23rd ACM SIGPLAN Symposium on Principles and Practice of Parallel Programming (PPoPP 2018).

Program Committee member for HPCC 2017.

Reviewer for ACM TOMS and ACM TACO Transactions on Architecture and Code Optimization, 2017.

NSF Panel 2017.

Program Committee for CHI UW (The 4th Annual Chapel Implementers and Users Workshop at IPDPS) 2017.

Poster Committee for Grace Hopper Celebration of Women in Computing 2017.

Program committee member for The 7th International Workshop on Polyhedral Compilation Techniques (IMPACT), 2017.

Reviewer for an ACM Transactions on Parallel Computing paper (TOPC), Fall 2016.

Reviewer for Journal of Parallel and Distributed Computing (JPDC), Fall 2016.

Reviewed a paper for 41st International Symposium on Mathematical Foundations of Computer Science, August 2016.

Mentor for the Women in HPC workshop at Supercomputing (SC) 2016.

Technical Papers Area Chair for the Programming Systems track at Supercomputing 2016.

Doctoral Showcase Program Committee, Supercomputing 2016.

Program committee member for Languages and Compilers for Parallel Computing (LCPC), 2016.

Program committee member for 3rd Annual Chapel Implementers and Users Workshop (CHI UW) 2016.

Program committee member for Ph.D. Forum, ISC High Performance, June 2016.

Light program committee member for Programming Language Design and Implementation (PLDI) 2016.

Reviewed 8 papers and participated in half-day, remote PC meeting.

IMPACT steering committee, 2016.

Co-chair for The 6th International Workshop on Polyhedral Compilation Techniques (IMPACT) 2016.

National Science Foundation Review Panel, 2016.

Reviewed grant proposal for Swiss National Science Foundation, 2016.

Mentor at Open Source Day at Grace Hopper Celebration of Women in Computing, 2015.

Program committee member for EduHPC at Supercomputing 2015.

Program committee member for LLVM in HPC Workshop at Supercomputing 2015.

Mentor for Mentor-Protege Program at Supercomputing, 2015.

Member of JPDC Editorial Board July 2015 to present.

Program committee member for Programming Language Design and Implementation (PLDI) 2015.

Program committee member for the ACM SIGPLAN Symposium on Principles and Practice of Parallel Programming (PPoPP) 2015.

Hour of Code presentation at local library, December 2014.

Publicity co-chair for Rocky Mountain Celebration of Women in Computing (RMCWiC) 2014.

Program committee member for Supercomputing 2014, technical program and BOFs.

Program committee member for Supercomputing 2014.

Program Co-chair for The 15th IEEE International Workshop on Parallel and Distributed Scientific and Engineering Computing (PDSEC), held in conjunction with IPDPS, 2014.

Reviewer, International Symposium on Code Generation and Optimization (CGO), 2014.

External program committee for The 19th ACM SIGPLAN Symposium on Principles and Practice of Parallel Programming (PPoPP), 2014.

Program committee member for International Workshop on Polyhedral Compilation (IMPACT), 2014.

Doctoral Showcase Committee, Supercomputing, 2013.

Judge for Student Research Competition at International Conference on Supercomputing (ICS), June 2013.

Program committee member for International Workshop on Polyhedral Compilation (IMPACT), 2013.

NSF panel, 2013.

NSF ad hoc review, 2013.

Program committee member for The 26th International Workshop on Languages and Compilers for Parallel Computing (LCPC), 2013.

Program committee member for The 25th International Workshop on Languages and Compilers for Parallel Computing (LCPC) 2012.

Program committee member for Supercomputing 2012.

Program committee member for Grace Hopper 2012.

Co-chair for the Rocky Mountain Celebration of Women in Computing (RMCWiC), 2012.

Co-organizer for Automatic Differentiation Workshop, 2012.

Program committee member for Principles and Practice of Parallel Computing (PPOPP), 2011.

Program committee member for Parallel Architectures and Compilation Techniques (PACT), 2011.

Program committee member for Memory Systems Performance and Correctness (MSPC), 2011.

Program committee member for the Workshop on Program Analysis for Software Tools and Engineering (PASTE), 2011.

Co-chair (general and program) for The 24th International Workshop on Languages and Compilers for Parallel Computing (LCPC), September 2011.

Program committee member for Programming Language Design and Implementation (PLDI), 2008, 2011.

Scholarship committee for Grace Hopper Celebration of Women in Computing (GHC), 2007, 2008, 2009, 2010, 2011.

Co-organizer for Concurrent Collections Workshop 2010.

Co-organizer for The First Workshop on Advances in Message Passing ( co-located with PLDI 2010 ), June 6, 2010.

Program committee member for the IEEE International Parallel and Distributed Processing Symposium (IPDPS), 2008, 2010.

Program committee member for Languages and Compilers for Parallel Computing (LCPC), 2010.

Program committee member for the Colorado Celebration of Women in Computing, 2010.

Program committee member for the ACM International Conference on Computing Frontiers, 2010.

Program committee member for the IEEE International Conference on High Performance Computing and Communications (HPCC), 2010.

External committee member for Programming Language Design and Implementation, PLDI 2009.

Co-organizer for the Front Range Architecture Compilers Tools and Languages Workshop, April 25, 2009.

Program committee member for Supercomputing (SC), 2004, 2005, 2008.

Led panel, “Confidential Advice for Junior Faculty”, Grace Hopper Celebration of Women in Computing (GHC), October 2008.

Two NSF Panels, 2008.

Tutorials chair for Programming Language Design and Implementation (PLDI), 2007.

Program committee member for the ACM SIGPLAN Symposium on Library-Centric Software Design (LCSD), 2007.

Program committee member for the International Conference on Parallel Processing (ICPP), 2006, 2007.

Program committee member for the 13th IEEE International Conference on High Performance Computing (HiPC), 2006.

Co-organizer for the Workshop on Domain-Specific Languages for Numerical Optimization (DSLOpt) held at Argonne National Laboratory, August 2004.

BOF program committee member for Grace Hopper Celebration of Women in Computing Conference 2004.

## **Internal Service Activities**

### **Professor at University of Arizona**

Acting Department Head, Fall 2018 and Spring 2019.

College of Science Workplace Climate Committee, Spring 2018 through Spring 2019.

Intro sequence committee, Spring and Fall 2018.

Curriculum committee chair, Fall 2017 and Spring 2018.

Faculty evaluation committee, Fall 2017 and Spring 2018.

Coordinating the Grace Hopper Celebration of Women in Computing with 12 CS students, 2017.

Faculty evaluation committee, Fall 2016 and Spring 2017.

Faculty recruiting and hiring committee, Summer 2016 through Spring 2017.

Coordinating the Grace Hopper Celebration of Women in Computing with 20 CS students, 2016.

Research Computing Governance Committee, started Fall 2016 and is ongoing.

Women in Computing student group faculty advisor, started Fall 2015 and is ongoing.

HPC Consultant Hiring Committee, Fall 2015 through Fall 2016.

Graduate recruiting and admissions committee, Fall 2015 through Spring 2016.

Faculty recruiting committee, Fall 2015.

**Assistant and Associate Professor at Colorado State University**

Graduate Program Director, June 2014 to April 2015.

Status of Women in Computing Committee, June 2014 to June 2015.

Chair of Graduate Recruitment Committee, Summer 2012 to Summer 2013.

Faculty Hiring Committee, August 2011 through Spring 2012.

Executive Committee, May 2011 to May 2013.

Graduate Recruitment Committee in Summer 2010 to present. Led effort to provide a funding guarantee to qualified PhD students and online pre-applications.

Facilities Committee in Summer 2009 to Spring 2010.

Faculty Hiring Committee in July 2008 through Spring 2009.

Judge for Celebrate Undergraduate Research and Creativity Poster session (CURC), April 2008, 2009.

Undergraduate committee member, July 2007 to May 2008.

Committee member for Sites/Regelson Scholarship, 2006 and 2007.

Panel member for UPE session on giving talks, November 2006.

Facilities committee member, Fall 2006 through June 2007.

**Graduate Student at University of California, San Diego**

Organized "How to get a job seminar," Fall 2003.

Graduate Co-chair of Women in Computing (WIC@UCSD), 1999-2000.

Authored the initial constitution and organized the startup of the group.

Representative for the Graduate Student Association (GSA), 1999-2000.

Successfully lobbied for TA lockers.

### Refereed Talks and Posters

- RP-19 Brandon Neth, "Automatic Parallelization of Irregular x86-64 Loops," Presented by Brandon at Code Generation and Optimization (CGO), 2019.
- RP-18 Brandon Neth, Sarah Willer, and Michelle Mills Strout. "Automatic Parallelization of Irregular x86 Loops Using Traces," Presented by Brandon at LCPC 2018.
- RP-17 Payal Nandy, Eddie C. Davis, Mahdi S. Mohammadi, Mary Hall, Michelle Strout, and Catherine Olschanowsky. "Abstractions for Specifying Sparse Matrix Data Transformations," Presented by Payal at ICPP 2018.
- RP-16 Jan Huckelheim, Paul Hovland, Michelle Strout, and Jens-Dominik Muller. "Exact replication of OpenMP-parallelism in reverse-mode AD for loops with symmetric memory access," Presented by Jan at the 7th International Conference on Algorithmic Differentiation (AD2016), 2016, extended abstract.
- RP-15 Michelle Strout in collaboration with Ian Bertolacci, Catherine Olschanowsky, Brad Chamberlain, Ben Harshbarger, and David Wonnacott. "Practical Diamond Tiling for Stencil Computations Using Chapel Iterators," Presented at the ACM SIGPLAN 2nd Annual Chapel Implementers and Users Workshop (CHI UW), June 2015.
- RP-14 Ian Bertolacci, advisors: Michelle Strout and Catherine Olschanowsky. "Chapel Iterators: Providing Tiling for the Rest of Us," won 3rd place in Supercomputing SRC for undergraduates, November 2014.
- RP-13 Speaker: Ian J. Bertolacci Authors: Ian J. Bertolacci, Catherine Olschanowsky, Michelle Mills Strout, and David G. Wonnacott, In Collaboration With Bradford L. Chamberlain and Ben Harshbarger. "Chapel Iterators: Providing Tiling for the Rest of us," Presented at SuperComputing 2014 as part of SC14 Chapel Lightning Talks BoF, November 2014.
- RP-12 David Wonnacott and Michelle Mills Strout. "On the Scalability of Loop Tiling Techniques," talk at the Fourth Annual CnC Workshop, December 2012.
- RP-11 Andrew I. Stone and Michelle Mills Strout. "Abstractions for Defining Semi-Regular Grids Orthogonally from Stencil Computations," poster with two page abstract to appear at LCPC, September 2012.
- RP-10 Andrew I. Stone, John M. Dennis, and Michelle Mills Strout. "Establishing a Miniapp as a Programmability Proxy," poster with two page abstract at PPOPP, February 2012.
- RP-9 Samantha Wood with Advisor Michelle Mills Strout. "SMOREs: Sparse Matrix Omens of Reordering Success," poster at the Programming Languages Design and Implementation (PLDI) Student Research Competition, *Winner of the PLDI SRC*, June 2011.
- RP-8 Amanreet Bajwa with Advisor Michelle Mills Strout. "Molecular Dynamics Task graph," poster at Grace Hopper Celebration of Women in Computing, November 2011.

- RP-7 Samantha Wood with Advisor Michelle Mills Strout. "Improving Performance of the Sparse Matrix Power Kernel through Matrix Reorderings," poster at Grace Hopper Celebration of Women in Computing, September 2010.
- RP-6 Jon Roelofs and Michelle Strout, "CnC-Based Transformations for Scalable Parallelization of Jacobi," The Second Annual Concurrent Collections Workshop, October 6th 2010. Jon Roelofs, an undergraduate at CSU, gave the talk.
- RP-5 Christie Williams and Michelle Mills Strout. "Introducing High School Chemistry Students to Computer Science," poster at SigCSE conference (ACM Special Interest Group on Computer Science Education), May 2009.
- RP-4 Michelle Mills Strout. "Using Hypergraphs and Bipartite Graphs for Run-Time Data and Computation Reordering." Talk abstract for SIAM Workshop on Combinatorial Scientific Computing, February 17-18, 2007. ( acceptance rate: 58% )
- RP-3 Michelle Mills Strout and Paul Hovland. "Using Hypergraphs to Improve Iteration Reordering Heuristics." Talk abstract for SIAM Workshop on Combinatorial Scientific Computing, February 27-28, 2004.
- RP-2 Michelle Mills Strout, Larry Carter, and Jeanne Ferrante. "Managing Tile Size Variance in Serial Sparse Tiling." Poster presented at *Supercomputing* 2001, Denver, Colorado.
- RP-1 Tung Nguyen, Michelle Mills Strout, Larry Carter, and Jeanne Ferrante. "Asynchronous Dynamic Load Balancing of Tiles." In the proceedings of *Ninth SIAM Conference on Parallel Processing for Scientific Computing*, San Antonio, Texas, March 22-24, 1999.

### Invited Talks

- T-34 "Orthogonal Abstractions for Scheduling and Storage Mappings." At Dagstuhl Seminar 17431 – Performance Portability in Extreme Scale Computing: Metrics, Challenges, Solutions, October 2017.
- T-33 "How Smart Should Compilers Be When Handling Abstractions for Locality." At the Fourth Workshop on Programming Abstractions for Data Locality (PADAL'17), August 2017.
- T-32 "Introduction to the Polyhedral Loop Transformation Framework." At Waseda University, host Professors Hironori Kasahara and Keiji Kimura, June 9, 2017.
- T-31 "High Performance Computing Research: The Loop Chain Programming Abstraction for Scheduling Across Loops." At Waseda University, host Professor Hironori Kasahara, June 7, 2017.
- T-30 "The Sparse Polyhedral Framework: Composing compiler-generated inspector-executor code." At Waseda University, host Professor Hironori Kasahara, May 31, 2017.
- T-29 "The Loop Chain Abstraction for Specifying Data Locality." At the Third Workshop on Programming Abstractions for Data Locality (PADAL'16), October 2016.
- T-28 "The High Performance Computing Juggling Act," at Argonne National Laboratory, host: Michael Garland, March 12, 2015.
- T-27 "The High Performance Computing Juggling Act," at Argonne National Laboratory, host: Paul Hovland, February 17, 2015.
- T-26 "The High Performance Computing Juggling Act," at the University of Arizona, host: David Lowenthal, January 15, 2015.
- T-25 "Michelle's Best Practices Guide to (HPC) Research," Students@SC, Research Panel: A Best Practices Guide to (HPC) Research, November 15, 2015.
- T-24 "Scheduling Across Loops to Solve the Multicore Scaling Problem," at Colorado School of Mines, host: Tracy Camp, November 13, 2014.
- T-23 "The High Performance Computing Juggling Act," at The Texas A&M University, hosts: Nancy Amato and Laurence Rauchwerger, November 10, 2014.

- T-22 “Correct and Efficient Run-time Parallelization,” with Michael Norrish at Australia National University, April 5, 2014.
- T-21 “Compilers for Regular and Irregular Stencils: Shared Problems and Solutions,” presented at The University of New South Wales, February 5, 2014.
- T-20 “Compilers for Regular and Irregular Stencils: Shared Problems and Solutions,” presented at the Workshop on Optimizing Stencil Computations (WOSC) associated with OOPSLA, October 27, 2013.
- T-19 “Bulk Synchronous to Asynchronous Parallelism: Using Loop Chains and Full Sparse Tiling to Get There,” presented at Australian National University, August 16, 2013.
- T-18 “Automating Run-Time Reordering Transformations with the Sparse Polyhedral Framework (SPF),” presented at Australian National University in Canberra, July 12, 2012.
- T-17 “Automating Run-Time Reordering Transformations with the Sparse Polyhedral Framework (SPF) and Arbitrary Task Graphs,” presented at Imperial College in London, November 21, 2011.
- T-16 “SAIMI: Separating the Algorithm from the Implementation Details,” presented at the DOE ASCAC Meeting , August 24, 2011.
- T-15 “Autotuning Needs for Run-Time Reordering Transformations,” presented at the CScADS Autotuning Workshop, August 8, 2011.
- T-14 “SAIMI and SPF: Separating the Algorithm from the Implementation Details in Sparse Computations,” presented at 2011 DOE Scientific Discovery through Advanced Computing (SciDAC) conference, July 12, 2011.
- T-13 “PIES: Parallelization using Inspector/Executor Strategies,” presented at CSU Best Practices Lunch, November 17, 2010.
- T-12 “A Speedy Tutorial on High Performance Computing,” presented at Colorado Celebration of Women in Computing, November 5, 2010.
- T-11 “Introducing the Sparse Polyhedral Framework (SPF),” presented at The Parallel Computing Laboratory (ParLab) at Berkeley, November 1, 2010.
- T-10 “Introducing the Sparse Polyhedral Framework (SPF),” presented at the Computer Science department at Rice University, August 27, 2010.
- T-9 “Introducing the Sparse Polyhedral Framework (SPF),” presented at the CU Boulder department colloquium, January 28, 2010.
- T-8 “OpenAnalysis: High-level Program Analysis,” presented at IBM Watson Research Center, June 2008.
- T-7 “Communication Avoidance for Sparse Applications Using Full Sparse Tiling,” presented at the MiniSymposium *Communication Avoiding Linear Algebra* held at SIAM Conference on Computational Science and Engineering, February 12-13, 2008.
- T-6 “Domain-Specific Program Analysis with OpenAnalysis,” presented at the MiniSymposium *Trends in the Evolution of Scientific Computing Software* held at SIAM Conference on Computational Science and Engineering, February 19-23, 2007.
- T-5 “Representation-Independent Compiler Analysis and Data-flow Analysis for MPI Programs,” presented at Cornell April 2006.
- T-4 “Automatic Generation of Run-time Reordering Inspectors,” presented at High Level Programming for High Performance Embedded Computing Systems Retreat, HiPHiPECS May 2006.
- T-3 “Domain-Specific Data-Flow Analysis and Other Analysis Problems,” presented at High Level Programming for High Performance Embedded Computing Systems Retreat, HiPHiPECS May 2005.
- T-2 “Performance Transformations for Irregular Applications,” presented at William and Mary, Williamsburg, Virginia, April 2004.

T-1 “Performance Transformations for Irregular Applications,” presented at Colorado State, Fort Collins, Colorado, February 2004.

### Posters and Other Talks

- P-29 Anthony Gabriel Encinas, advisor: Michelle Strout. “Today’s Computers Have Limits: Let’s Break Them with Quantum Computing!” Won honorable mention in the Analytical Research category at the First Year Honors Project Showcase at the University of Arizona, May 2016.
- P-28 Ian Bertolacci, advisors: Michelle Strout and Catherine Olschanowsky. “Orthogonal Scheduling of Stencil Computations with Chapel Iterators,” won Best Undergraduate Poster at the Rocky Mountain Celebration of Women in Computing (RMCWiC), October 2014.
- P-27 “Grad School and Postdoc Positions in the United States,” presented at Australia National University to about 30 undergraduate and graduate students, October 17, 2013.
- P-26 “The CGPOP Miniapp,” by Andrew Stone, John Dennis, and Michelle Strout. Presented by Andrew Stone at HPC 2011 - First Annual Front Range High Performance Computing Symposium, September 23-24, 2011.
- P-25 “Sparse Polyhedral Framework and CACHE,” presented at the Algorithms and Software for Communication Avoidance and Communication Hiding at the Extreme Scale (CACHE Institute) PI meeting, August 2, 2011.
- P-24 “The CGPOP Miniapp,” by John Dennis (NCAR), Andrew Stone (Colorado State University), Michelle Mills Strout (Colorado State University). Presented at the DOE Scientific Discovery through Advanced Computing (SciDAC) conference, July 12, 2011.
- P-23 “MeggyJava: Making the Compilers Course More Attractive to Undergraduate Students,” by Ryan Moore. Advisor: Dr. Michelle Strout. Presented at CURC, April 2011.
- P-22 “Asynchronous Parallelism in Sparse Linear Algebra,” Jon Roelofs and Michelle Strout, presented at CURC, April 2011.
- P-21 “Having Fun with Computer Science and Compilers,” guest speaker for introductory CS course, October 2010.
- P-20 “Separating Algorithm and Implementation via programming Model Injection (SAIMI),” talk presented to the CSU Software Engineering research group, April 22, 2010.
- P-19 “Introducing the Sparse Polyhedral Framework,” talk presented at Front Range Architecture, Compilers, Tools, and Languages Workshop (FRACTAL), December 5, 2009.
- P-18 “Having Fun with Computer Science and Compilers,” guest speaker for introductory CS course, November 2009.
- P-17 “Some CS Education Practice and Theory: High Performance Computing Perspective,” talk presented at Industrial Advisory Board Meeting, October 2008.
- P-16 “Research Opportunities at CSU in Compilers and Scientific Computing,” talk presented at department seminar (BMAC), September 2008.
- P-15 “Pizza and PIES (Parallelization Using Inspector/Executor Strategies),” talk presented by Michelle Strout, Tim Lenczycki, Kelly Suto, Christie Williams, Alan LaMielle, Kate Ericson, and Jeshua Bratman, August 2008.
- P-14 “DFAVis: A Visual Debugger,” poster presented by Kiley Grait at the Colorado Celebration of Women in Computing (CCWIC), April 2008.
- P-13 “Scalability and Register Tiling in the Shallow Water Model,” poster presented by Christie Williams at Celebrate Undergraduate Research and Creativity Poster session (CURC), April 2008.
- P-12 “Parallelizing Irregular Gauss-Seidel Using Full Sparse Tiling,” talk presented at Front Range Architecture, Compilers, Tools, and Languages Workshop (FRACTAL), April 26, 2008.
- P-11 “Runtime Reordering Transformations”, talk presented at Future of PL Research and Education Workshop at PLDI 2008 PC meeting, January 26, 2008.

- P-10 “Generation of Pointer Cognizant Data-Flow Analyses From Succinct Specifications,” presented at Front Range Architecture, Compilers, Tools, and Languages Workshop (FRACTAL), October 14, 2007 presented by Andrew Stone.
- P-9 “Smashing Periodic Domains,” presented at FRACTAL, October 14, 2007 presented by Nissa Osheim and David Rostron.
- P-8 “Representation-Independent Alias Analysis and Data-Flow Analysis,” presented at Front Range Architecture, Compilers, Tools, and Languages Workshop (FRACTAL), February 10, 2007.
- P-7 “Combinatorial Scientific Computing and Petascale Simulations (CSCAPES) SciDAC Applied Math Institute,” poster by Alex Pothen, Florin Dobrian and Assefaw Gebremedhin, Old Dominion University Erik Boman, Karen Devine and Bruce Hendrickson, Sandia National Laboratories Paul Hovland, Sanjukta Bhowmick, Boyana Norris and Jean Utke, Argonne National Laboratory, Umit Catalyurek, Ohio State University, Michelle Strout, Colorado State University, SciDAC Organizational Meeting, February 2007.
- P-6 “Automatic Generation of Bit-vector Analysis Using OpenAnalysis,” poster by Shweta Behere, Michelle Strout, and Paul Hovland, ISTeC Student Research Poster Contest, November 29, 2006.
- P-5 “Linearity Analysis: An Example Domain-Specific Analysis,” talk presented at the Workshop on Domain-Specific Languages for Numerical Optimization (DSLOpt) August 18-20, 2004.
- P-4 “Using the OpenAnalysis Toolkit with OpenAD”, Poster at the 4th International conference on Automatic Differentiation, July 2004.
- P-3 “Performance Transformations for Irregular Applications,” talk presented at the University of Chicago Computation Institute Brown Bag Lunch, October 30, 2003.
- P-2 “Tiling for Iterative Sparse Matrix Computations”, talk presented at Research, Careers, and Computer Science: A Maryland Symposium, Fall 2001.
- P-1 “Storage Allocation for Register Tiling”, talk presented at Dagstuhl, Instruction Level Parallelism, April 1999.
